

**ENVIRONMENT****OVERVIEW**

Relying upon the leadership and direction of the Advisory Committee on Climate Action and the Environment (ACCAE), and with a direct focus on the advancement of Indigenous Knowledge Systems through the support of the Assembly of First Nations (AFN) Elders Council, the AFN Environment Sector functions to enhance the exercise of First Nations' self-determination and jurisdiction within the context of the natural environment.

The AFN Environment Sector is guided by a wide variety of resolutions passed by the Chiefs-in-Assembly all of which call upon the AFN to engage in a range of distinct environmental issues. This includes the establishment of several joint AFN-Canada tables, as well as providing regional supports through meetings and other information-sharing.

UPDATE

Climate Change

In the face of a rapidly changing climate, First Nations have much to contribute to global climate action. First Nations' collective knowledge as observers, stewards, and interpreters of ecosystems offers invaluable insight to lead and complement action on climate change. Led by the Advisory Committee on Climate Action and the Environment, the AFN Environment Sector is working to support the critical role of Indigenous peoples in climate mitigation and adaptation efforts to drive an evolution towards more sustainable growth and economic development. This includes engagement in a joint technical process with Canada framed around the Joint Committee on Climate Action (JCCA), as well as the establishment of a network of First Nations Regional Climate Change Coordinators. It also

included, in collaboration with the ACCAE, a submission to the Standing Committee on Finance and the Standing Senate Committee on Energy, the Environment, and Natural Resources on the Greenhouse Gas Pricing Act (Bill C-74).

Species at Risk

The federal *Species at Risk Act* (SARA) provides for the legal protection of wildlife species and the conservation of biological diversity, in accordance with Canada's commitments under the Convention on Biological Diversity. The SARA is the only piece of federal legislation that explicitly recognizes the role of Indigenous Peoples in the administration and implementation of the Act. The AFN Environment Sector is working with officials from Environment and Climate Change Canada (ECCC) to support the direct inclusion of First

ISSUE UPDATE

May 2018

Nations interests in species protection and conservation across Canada. This includes the creation of a new First Nations Advisory Committee on Species at Risk (FNACSAR) which is a First Nation-specific joint technical committee created under *Section 9* of the SARA to advise the Minister of Environment and Climate Change and other competent Ministers on the application and implementation of the *Act*. The FNACSAR will meet for the third time on June 14 and 15, 2018 in Ottawa.

Environmental and Regulatory Reviews

Following fourteen months of federal “engagement”, the Government of Canada introduced Bill C-68: *An Act to amend the Fisheries Act and other Acts in Consequence*; and Bill C-69: *An Act to enact the Impact Assessment Act and the Canadian Energy Regulator Act*, to amend the Navigation Protection Act and to make consequential amendments to other Acts into the House of Commons. The Environment sector is involved in this review to engage in a focused dialogue with First Nations to substantively identify and recognize the protocols and for joint processes on the drafting of legislative amendments, policies and regulations. The AFN Environment Sector continues to host a series of technical

sessions across the country in this regard. In collaboration with the ACCAE, the AFN Environment Sector made a submission to Bill C-69. Bill C-68 was handled by our National Fisheries Committee (NFC).

Indigenous Protected and Conserved Areas (IPCA)

Working as part of Canada’s “Pathway to Canada Target 1” initiative, the AFN Environment Sector is supporting the creation of First Nations’ protected and conservation areas whereby First Nations are able to exercise their jurisdiction over broad swaths of their territories, and to have these areas recognized in Canada and in an international context. This comes after Chiefs-in-Assembly passed Resolution 79/2017, *Indigenous Protected and Conserved Areas*, directing the AFN to engage with the Minister of Environment and Climate Change Canada and the Chief Executive Officer of Parks Canada to ensure the critical leadership role of First Nations in discussing the process for establishing IPCA’s nationally.

NEXT STEPS

The following confirmed activities will take place between May 31 and July 31, 2018, led by the AFN Environment Sector:

- Environmental and Regulatory Reviews Technical Information Session, June 22 and 23, 2018, Ottawa, ON (proposed)

- First Nations Advisory Committee on Species at Risk, June 14 and 15, 2018, Ottawa, ON.
